

Grant Baldwin, PhD, MPH, Director of the Division of Unintentional Injury Prevention at the National Center for Injury Prevention and Control, CDC

Dr. Grant Baldwin is the Director of the Division of Unintentional Injury Prevention at the National Center for Injury Prevention and Control. He has served in this capacity since September 2008.

Unintentional injuries are the leading cause of death for persons ages 1 to 44 years. DUIP is dedicated to reducing the number and severity of unintentional injuries through science-based programs and applied research. Besides a focus on reducing child injuries, CDC works to prevent injuries and deaths from many causes, including motor vehicle-related crashes, prescription drug overdoses, and traumatic brain injuries.

Dr. Baldwin joined the CDC Injury Center in November 2006 as acting Deputy Director. In this role, Dr. Baldwin assisted the NCIPC Director in providing overall leadership and direction for the Center.

Prior to this appointment, Dr. Baldwin served as a senior advisor in the CDC Coordinating Center for Environmental Health and Injury Prevention and the National Center for Environmental Health / Agency for Toxic Substances and Disease Registry. He began his career at CDC in September 1996.

Dr. Baldwin received his PhD in Health Behavior and Health Education at the University of Michigan School of Public Health in 2003. He also received a MPH in Behavioral Sciences and Health Education from the Rollins School of Public Health at Emory University in 1996.

Dr. Baldwin is an adjunct Assistant Professor in the Department of Behavioral Sciences and Health Education for the Rollins School of Public Health at Emory University. He teaches two courses in the distance-based MPH program.

Dr. Baldwin is married to Laura Zauderer Baldwin and they have a son named Aaron. When he is not spending time with family or working, Dr. Baldwin is an avid cyclist. He races competitively for a local cycling team.
